

Eugene Kipchumba

Full-Stack Developer & IT Student

✉ kipchumbakeugene@gmail.com

github.com/MrGene-1

Nakuru, Kenya

PROFILE

Diploma in Information Technology student at Kabarak University with hands-on experience across full-stack web and mobile development, embedded electronics, and hardware repair. Comfortable working independently through the full build cycle — from database and backend design to UI polish and deployment — with a track record of shipping complete, real-world systems including a point-of-sale platform, Android applications, and production websites.

TECHNICAL SKILLS

Web Development

HTML5, CSS3, JavaScript, Flask, SQLite, responsive & accessible UI design

Hardware & Electronics

Arduino, ESP32, Raspberry Pi, computer & audio equipment repair, thermal receipt printing (ESC/POS)

Mobile Development

Android Studio, React (prototyping), mobile UI/UX, payment integration (M-Pesa)

Tools & Platforms

Git & GitHub, VirtualBox / Kali Linux, k6 load testing, Windows deployment environments

PROJECTS

Point of Sale System — Resort Management

Flask · SQLite · Python

- Built a multi-file POS system with three role tiers (Admin, Manager, Waiter) and PIN-based waiter login
- Integrated ESC/POS thermal receipt printing for physical hardware, audit logging, and automated midnight backups
- Designed a full admin dashboard and deployed the system locally for live business use

Resort Website Redesign

HTML · CSS · JavaScript

- Led a full front-end audit and rebuild covering SEO, accessibility, and performance
- Rewrote the site's styling from scratch to deliver a refined editorial design aesthetic

Android Applications

Android Studio · Java/Kotlin

- Developed an Android overlay application for on-screen utility features
- Built a delivery and payments app concept with M-Pesa integration, plus an interactive React prototype spanning checkout, order tracking, and rating flows

EDUCATION

Diploma in Information Technology

Kabarak University, Nakuru, Kenya

Relevant coursework: Computational Thinking, Discrete Mathematics, Information Technology Essentials, Computer Applications, Web Development

INTERESTS

DIY electronics & maker projects, open-source software, financial literacy tools, and mentoring in reading & STEM curiosity.
